Vegetable Seed Trials

JAN 12 1932

# FOREWORD....

IN SENDING out this, our Spring Catalog for 1932, we wish to heartily thank all our patrons who have favored us with their orders in the past. To these friends we need not try to recommend ourselves. They know of our prompt and efficient service and the high quality of our seeds and other garden products which we handle.

TO THOSE readers who have not already given us any business, we would say that the seeds we send out are of the best strains obtainable, of known pedigree, and have been grown expressly for us through contracts which we placed last Spring with some of the largest seed growers in the world. With the addition of a few new and meritorious varieties, these are the same strains which have given so much satisfaction to our customers in the past, and we solicit your orders feeling assured that you will be pleased and satisfied as a result.

WE CARRY at our store a large stock of Jardinières, Vases, Bird Baths and Houses, Sundials and Garden Furnishings and Tools, which are not listed in this catalog. We are always pleased to welcome out-of-town customers at our store and show them our stock.

BEING LOCATED outside the limits of the large cities, such as New York or Philadelphia, we are enabled to work with a comparatively smaller overhead expenditure, and whatever economies are effected in this way we endeavor to pass on to our customers.

OUR WISH for all our friends is that they may experience both pleasure and profit from their gardening activities during the year 1932.

## CUSTOMER'S SERVICE DEPARTMENT

WE ARE always pleased to help our customers, especially amateurs, who may need advice in connection with their gardening problems. If you are in doubt as to the special treatment or soil conditions for any particular plant, or desire information on suitable varieties for various local conditions, or in regard to your lawns, shrubbery, etc., do not hesitate to communicate with our "Service Department," which is always freely at the disposal of our customers.

## GARDENERS AND FARMERS

WE HAVE at all times the names of practical gardeners and farmers on our register who are in want of situations. If parties desiring such will write us, we shall be glad to put them in communication with men we deem suitable. We make no charge for this service.

ORDER EARLY—We urge our patrons to send in their orders as soon as possible after this catalog is received. This allows us ample time to give careful attention to the filling and dispatching of same before the "crowded hours" tax our energy and resources to the limit, when the sowing season actually commences.

TETHER & DON gives no warranty, express or implied, as to description, quality productiveness or any other matter of any seeds, bulbs or plants they send out and they will not be in any way responsible for the crop. If the purchaser does not accept the seeds on these terms, they are at once to be returned.

**Depth to Cover the Seed.** Following is a good general rule—cover to a depth equal to  $2\frac{1}{2}$  times the diameter of the seed. Exceptions—50 per cent deeper when sowing during hot weather, or on soils that dry out quickly; 50 per cent less deep when sowing on heavy land or during wet weather.

**A Good Hint.** Radish is a strong germinator, while Beet, Parsley, Carrot, Celery, Parsnip, Onion and some others are weak; it is recommended to mix a small quantity of Radish with these seeds when sowing, removing the Radishes afterwards. Radish seedlings break the soil crust and quickly mark your row. This process is particularly advantageous upon soils that bake.

# LAWN GRASS SEEDS

For the formation of new lawns, 1 lb. will sow 200 square feet, or 10x20; 100 lbs. will sow one acre. For renovating old lawns, use one-half this quantity.

## "EVERGREEN" LAWN GRASS

This is a mixture of the finest American and European grasses best adapted for lawns. It is prepared from our own formula, and is a careful blending of varieties suitable to producing the thick growth and velvety appearance so much sought after.

Lb. 60c., 5 lbs. \$2.95, 10 lbs. \$5.80, 25 lbs. \$14.25,  
100 lbs. \$55.00

## "CENTRAL PARK" LAWN GRASS

Weight per bushel, 20 lbs.

This is a popular lower priced mixture and is well suited for various soil conditions. Forms a thick turf in a very short time.

Lb. 45c., 5 lbs. \$2.20, 10 lbs. \$4.30, 25 lbs. \$10.50,  
100 lbs. \$40.00

## "SHADY PLACE" LAWN GRASS

Weight per bushel, 20 lbs.

This mixture is composed of grasses that are naturally adapted for growing under trees and shaded situations.

Lb. 60c., 5 lbs. \$2.95, 10 lbs. \$5.80, 25 lbs. \$14.25,  
100 lbs. \$55.00

## "LAWN RESTORING" GRASS MIXTURE

Weight per bushel, 20 lbs.

A mixture of grasses suited to take firm hold and quickly in unfavorable situations.

Lb. 55c., 5 lbs. \$2.70, 10 lbs. \$5.30, 25 lbs. \$13.00,  
100 lbs. \$50.00

## "LAWN TENNIS" GRASS MIXTURE

Weight per bushel, 20 lbs.

Will make a fine green and lasting turf.

5 lbs. \$2.70, 10 lbs. \$5.30, 25 lbs. \$13.00, 100 lbs. \$50.00

## "TERRACE" GRASS MIXTURE

Weight per bushel, 20 lbs.

A mixture of grasses with long, interlacing roots, that will bind steep embankments.

5 lbs. \$2.70, 10 lbs. \$5.30, 25 lbs. \$13.00, 100 lbs. \$50.00

## "SEASHORE" GRASS MIXTURE

Weight per bushel, 20 lbs.

Composed of grasses suitable for seaside lawns.

5 lbs. \$2.70, 10 lbs. \$5.30, 25 lbs. \$13.00, 100 lbs. \$50.00

For FIELD and GOLF COURSE GRASSES, see page 22 and 23

# Novelties and Specialties in Vegetables

White Boston Lettuce

## BEET Winter Keeper

This Beet is also known as Long Season and Coal Black.

It is a late Beet, not of handsome shape, but of exceptionally fine quality, remaining sweet and tender even when very large.

The Beets will keep all Winter and retain their fine quality until Spring. They are half long, very dark red and have green foliage.

Pkt. 15c., oz. 40c.,  $\frac{1}{4}$  lb. \$1.25, lb. \$4.00

## BROCCOLI Italian Green Calabrese

There is a growing demand for this vegetable, which is very similar to Cauliflower, both in culture and cooking.

Pkt. 25c.,  $\frac{1}{4}$  oz. 75c., 1 oz. \$2.50

## BRUSSEL SPROUTS Brechtin Castle

A superior strain of fine quality and a wonderful exhibition variety.

Pkt. 10c.,  $\frac{1}{2}$  oz. 30c., oz. 60c.,  $\frac{1}{4}$  lb. \$2.00

## CAULIFLOWER First and Best

This is the earliest of all Cauliflowers and is particularly adapted for forcing under glass, and for very early Spring crop outdoors. It is very white, smooth and even in character.

Pkt. 50c.,  $\frac{1}{4}$  oz. \$2.50, oz. \$8.00

## CORN Golden Early Market

This is the earliest yellow sweet corn on the market today. Matures about one week earlier than Golden Sunshine. Stalks  $4\frac{1}{2}$  ft. high with ears 6 inches long, rather blocky. A good variety for market men as well as private gardeners.

Lb. 35c., 2 lbs. 65c., 10 lbs. \$3.00

## LETTUCE White Boston

The best strain of the butter head type, 10 days earlier than Big Boston. Very large frame and head. Will not tipburn, nor turn red, and will hold several days in the field after maturity before bolting to seed.

Pkt. 15c., oz. \$1.00,  $\frac{1}{4}$  lb. \$3.00

## MUSKMELON Caroline Clark

Finely netted, dark green skin; flesh salmon pink, delicious sweet flavor. Early and vines are blight proof.

Pkt. 50c., 1 oz. \$2.00

## ONION Ailsa Craig

This variety is used very extensively for exhibition purposes as well as culinary. Will grow very large, often weighing 2 lbs. apiece.

Our strain is extra selected. Pale straw-colored.

Pkt. 25c., oz. \$1.00,  $\frac{1}{4}$  lb. \$3.50

## PEPPER California Wonder

This new and distinct Pepper possesses many points of excellence. It has the fine quality of the Pimento and the size of Giant Crimson with a thickness of flesh unknown in any variety of pepper. It is not uncommon to find fruits showing flesh three-eighths of an inch thick. In addition to this it is of the finest quality, being sweet, crisp, tender and entirely free from pungency.

Pkt. 25c.,  $\frac{1}{2}$  oz. 75c., 1 oz. \$1.25

## SQUASH Straight Neck

A valued selection from the giant summer crook-neck squash with none of its defects. Fruits, which measure 18 to 20 inches in length, are of a deep orange color, intensely warted, and have a deeper flesh which is thicker and more meaty than the old type.

Pkt. 15c., oz. 35c.,  $\frac{1}{4}$  lb. \$1.00

## TOMATO Essex Wonder

This variety is a very heavy yielder and is extremely hardy, withstanding quite a good deal of frost. The fruits are thin skinned, and of excellent flavor.

Pkts. 50c

## TOMATO Marglobe

A main crop scarlet fruited variety of globe type. It fruits early and continues to yield up until frost. It resists wilt and is immune to rust.

Per pkt. 10c.,  $\frac{1}{2}$  oz. 45c., 1 oz. 85c.,  $\frac{1}{4}$  lb. \$3.00

## LETTUCE

One ounce will sow 150 feet of drill.

With the proper selection of varieties, a continuous supply of Lettuce can be had throughout the season by sowing seed outside at intervals of two weeks, from April 15 to August 15. Use the head Lettuce for early and late sowing, and the leaf Lettuce during the summer months. To produce solid heads, plants in very rich soil. For first-early crop, sow in hotbed in March, and transplant outside the middle of April. Sow outdoors as soon as the ground opens, in drills from 1 to 2 feet apart, covering the seed with ¼ inch of soil. Thin out to 10 inches apart. Lettuce should not be transplanted after May 15, or you will not get heads. Drop two or three seeds every 10 inches and leave the strongest plant to grow.

## GRASS SEED FOR HAY AND PERMANENT PASTURE

These mixtures include the most nutritive and productive species of grasses suitable for laying down light, medium and heavy soils to permanent grass.

The quantity of each variety is carefully regulated with the object of forming pastures that will yield, in the shortest time after being laid down, the heaviest crop of grass during the whole of each growing season, and in all kinds of weather. Early and late species are included in suitable proportions so that the productive period may be extended as much as possible.

We recommend sowing ten pounds of mixed clovers to the acre in addition to the under-noted mixtures in the spring.

Special Mixtures for Light, Medium and Heavy Soils. 25 lb. \$11.00; 100 lb. \$40.00

# T & D's Novelties and Specialties in Flowers

## AQUILEGIA (Long Spurred)

### T. & D.'s Gold Medal Strain

This is a great improvement on any other strain in cultivation. The flowers when fully opened expand into a beautiful star like form, and for large size and brilliant and varied colors are unequalled.

Per pkt. — 60c      5 pkts. — \$2.50

## AQUILEGIA

### Red Riding Hood

Lovely variety of double aquilegia, umbrella like old rose calyx is spread out above the pure white double corolla of these dainty blooms; a very uncommon and effective color combination.

Pkt. — 50c      5 pkts. — \$2.00

## ARCTOTIS

### Scapigera

A half-hardy species from South Africa, of vigorous growth and producing large composite flowers 2 to 3 inches across in a great variety of colors — orange, terra cotta red, yellow, cream, salmon, carmine, etc. Very showy and effective in beds or borders.

Pkt. — 25c      5 pkts. — \$1.00

## CAMPANULA

### Persicifolia, Telham Beauty

Immense globular, bell-shaped flowers of a lovely soft lavender blue, produced on long stems. Height 2 feet.

Pkt. — 35c      3 pkts. — \$1.00

## CYNOGLOSSUM

### Nervosum

This is a valuable addition to the blue flowered perennial plants for the herbaceous border. The large flowers are a rich gentian blue, freely and continuously produced throughout the summer, the foliage is loose and graceful, while the dark green leaves add considerably to the appearance of the plant.

Pkt. — 50c      5 pkts. — \$2.25

## HELIOPHILA

A charming new annual with pretty blue white eyed flowers which are freely produced in long racemes; height 18 in.

Pkt. 50c

## MARIGOLD

### Guinea Gold

A distinct type of graceful pyramidal habit 2 to 2½ ft. high producing 30 to 40 flowers of a brilliant shade of orange flushed with gold. Unlike the ordinary African Marigold this variety produces no single flowers.

Pkt. — 35c      3 pkts. — \$1.00

Aquilegia, Gold Medal Strain

## MIGNONETTE

### Matchless

A special strain for forcing, producing immense, well formed spikes. A true exhibition variety.

Pkt. 75c.,      ⅛ oz. \$3.00,      ¼ oz. \$5.00

## NASTURTIUM

### Double Sweet Scented

### Golden Glean

The plant forms a vigorous, large bush which throws out short runners, averaging 18 inches, and when it is in full bloom the entire plant, including the runners, is a blaze of color. The large, golden-yellow flowers are borne on erect, stiff stems six inches in length. Consequently, the flowers stand well above the foliage, an arrangement which adds immeasurably to the showy appearance of the plant.

When well grown these flowers have the appearance of a fully double flower, and are all the more attractive because of their fragrant scent.

1 oz. \$2.00      ½ oz. \$1.25      pkt. 35c

## ICELAND POPPY (Papaver Nudicaule)

### Sanfords Giant Strain

This is a free flowering strain with very large flowers many of them 5 in. across. Their beauty is enhanced by a dense ring of yellow anthers on bright green stamens. Stems very thick and strong, from 2 to 3 feet in length. This strain embraces practically all colors.

Pkt. — 35c      3 pkts. — \$1.00

T. &amp; D.'s NOVELTIES and SPECIALTIES in FLOWERS—Cont.

**SCABIOSA CAUCASICA****Giant Hybrids—Isaac House Strain**  
(Hardy)

A great improvement over the Caucasica being more vigorous, with larger and longer stems and larger petals, which are ruffled and slightly frilled on the edges. In this strain you will find colors ranging from white to the darkest blue, but the predominating colors are delicate lilac and mauve.

Pkt. — 50c      5 pkts. — \$2.00

**TROLLIUS LEDEBOURI**  
**Golden Queen**

A new hardy perennial, growing four feet high, producing large, rich golden yellow flowers with a deep orange center. A free and long blooming perennial.

Pkt. — 50c      5 pkts. — \$2.25

**URSINIA ANETHOIDES**

A brilliant orange colored daisy-like annual. Foliage, finely cut, flowers measure over 2 in. in diameter with a deep purple zone around the center; borne on long wiry stems. Makes fine pot plant for greenhouse. Wants sunny position. Height 1 ft.

Pkt. — 50c      5 pkts. — \$2.25

**VENIDIUM FASTUOSUM**

This beautiful annual attains a height of two to three feet. Numerous rich orange colored daisy-like flowers with a purple black zone at the base of the petals, rise above the greyish silky foliage. Flowers average 4 to 5 inches across.

Pkt. — 50c      5 pkts. — \$2.25

Sanford's Giant Strain  
Iceland Poppy

New Zinnia, Pinkie

**VERBASCUM**

**Harkness Hybrid.** Immense spikes, well furnished with large fine yellow flowers during the whole summer. A fine companion to the white variety, Miss Willmott. Hardy biennial. Height 6 ft. — \$0.25

**Miss Willmott.** Large white flowers from July to October produced on stately spikes 5 to 6 feet in height. Hardy biennial ..... .35

**Phoeniceum.** Flowers of various colors including white, pink, mauve, purple and blue. Stems about 2 ft. high. Hardy perennial. May also be treated as a greenhouse subject, and if sown indoors in pots in June or July will flower in early spring. .35

**Olympicum.** Yellow flowers on stately stems about 6 ft. high. Leaves covered with silvery down. Hardy perennial ..... .35

**NEW ZINNIA****Cut and Come Again Pinkie**

Medium sized flowers of a light Rose-Pink with long stems especially suitable for cut flowers and for massing in the garden. A continuous succession of blooms are produced throughout the summer, making the name Cut and Come Again most appropriate. The dainty color and form of PINKIE are so charming as to quite overcome the criticism of coarseness so often complained of in Zinnias.

# T & D's General List of Choice Flower Seeds

**H.A.**—Designates Hardy Annuals. These can be sown in the open ground. They flower and mature their seed and die in one year.

**H.H.A.**—Designates Half Hardy Annuals. For early results sow in the house, greenhouse or hotbed in February to April and transplant to the garden as soon as the weather is settled, or seed may be sown outdoors about the middle of May.

**H.B.**—Designates Hardy Biennials. Sow in the open border from June to September. The plants Winter without protection, flower and die the second year. Although some varieties will flower the first year if sown very early.

**H.H.B.**—Designates Half Hardy Biennials. Must have protection during the Winter.

**H.P.**—Designates Hardy Perennials. They are perfectly hardy and will stand over Winter without protection. With few exceptions they flower the second year after sowing and continue to bloom for many years.

**H.H.P.**—Designates Half Hardy Perennials. Plants require protection during the Winter.

**G.P.**—Designates Greenhouse Plants. They should be grown under glass in the greenhouse, conservatory or in the house window.

## T & D's Wonderful Snapdragons

**ANTIRRHINUM, Snapdragons H.H.P.**

Splendid half hardy perennials of exquisite form and color, that will bloom from July until frost. Very showy in beds or borders, and a very choice cut flower; extensively forced under glass during the Winter. For early flowers, sow indoors during February or March, but if sown outdoors early in May, will bloom in July.

## GIANT ASTERS H.H.A.

Asters without a doubt are one of the most popular flowers grown because of their easy culture. It matters little whether the soil is rich or poor. You can enjoy an abundance of beautiful flowers from early July until late in September with the help of the different kinds offered below.

### IMPROVED CALIFORNIA SUNSHINE

#### Anemone Flowered

An interesting and attractive type of Aster. The plants are sturdy and strong, throwing up long flower stalks, making wonderful cut flowers. Some of the flowers have quilled petals; all have a cushion center of tiny quills of a contrasting color which makes a flower look as if it were covered with snowflakes. The blue flowers are dotted with a paler blue and some in white, and the rose in a lighter shade of pink or white. The California type of Sunshine Aster which we offer is a great improvement on the original, the flowers being larger and borne on longer stems. The entire effect is very graceful and pleasing and no gardener should fail to grow this beautiful variety.

Violet	White	Mixed	

Any of the above colors, or mixed pkt. 25c., ¼ oz. \$1.50  
Collection, one pkt. each of above 6 colors \$1.25

### GIANT MASTERPIECE

The Masterpiece Aster is a new midseason to late flowering strain and is characterized by the exceptionally large blooms, long, vigorous stems and sturdy habit of growth. The plants grow 3 to 3½ feet high with long stems, 18 to 30 inches in length, bearing beautifully formed and interlaced flowers 5 to 6 inches in diameter. By careful selection the strain has been still further improved since we offered it last season, the purity and clarity of the colors being unapproached by any other type of Aster. The blooms are excellent for cutting and stand up well when shipped.

# T. and D.'s SELECTED SWEET PEAS

## CULTURE OF SWEET PEAS

In order to have any success at all with Sweet Peas they should be planted very early, as soon as the ground can be worked in the spring.

Whenever possible select a position in the garden where they will get morning and forenoon sun only and no afternoon sun; in this way the flowering season will be long and the stems more satisfactory.

Dig a trench about a foot wide and deep and fill in about 4 inches with well rotted barnyard manure. Then replace 4 inches good garden soil. Then open 2 drills or rows about 8 to 10 inches apart and plant seed 1 inch deep.

Whenever the plants are well up they should be thinned out to six inches apart and another two inches of soil applied.

The brush or wire support is placed in the center of the two rows to act as a support to which the vines from both sides can cling.

Watering: Whenever the soil begins to get a little dry give a thorough soaking; about once a week at first and later on twice a week, which is much better than a little sprinkle every day.

Feeding: In most soils Sweet Peas will benefit from Liquid Manure applied after the plants have flowered for some time.

Do not allow dead flowers to remain on vine. The more flowers you pick, the more you will have.

# T. & D.'s CHOICE ZINNIAS

## YOUTH AND OLD AGE

The Zinnia is one of the most brilliant, showy and satisfactory of annuals, has long been a general favorite, and is now enjoying a wide popularity, not only for garden decoration, but also for cutting. The seed can be sown early in the hotbed or light window and transplanted, or sown later in the open ground. They come into flower early in the Summer and keep on blooming until frost.

# SUMMER FLOWERING BULBS AND ROOTS

## BEGONIAS, Tuberous Rooted

Tuberous-rooted Begonias are unexcelled for summer display in window or porch boxes, beds or borders in semi-shaded positions. The gorgeously colored flowers, of waxy texture, often measuring 4 to 6 inches in diameter, are produced in steady succession until frost.

Culture: Tubers may be started in February or March either singly or in small pots, or set 2 inches apart in flat boxes. The soil should be light, containing plenty of leaf-mould and sand. In planting, care should be taken to set the crown of the tuber, which is usually somewhat depressed, upward. The tubers should be covered ½ inch with light soil and watered sparingly until they start. Keep temperature at 60 to 70 degrees. The started plants may be transferred to the open beds early in June, setting the plants 10 to 12 inches apart. Tubers may be planted in the open the last week in May and will give excellent results.

## HARDY GARDEN LILIES

The Lilies listed below are for spring planting and should be planted by June 1st. Bulbs should be planted six inches deep except where noted. Lilies do best in the hardy border or among shrubbery, because the flowering stems bear masses of roots immediately below the ground surface, and the shady situation helps protect these feeding roots from the hot sun. Lilies thrive in any well-drained garden soil where the ground does not become water-logged, but do not want to come in contact with fresh manure.

*Lilium auratum*

**Auratum** (The Golden-banded Lily of Japan). Delicate ivory white color, thickly studded with chocolate, crimson spots and striped through the center with a golden yellow band. Should be planted 8 to 10 in. deep, in sunny or partly shaded situation. August.

	Each	Doz.	100
Extra Size Bulbs, 11 to 13	\$0.60	\$6.00	\$50.00
Mammoth Size Bulbs, 9 to 11	.50	5.00	40.00

**Auratum Phatphyllum.** By far the most vigorous of the Auratum family. Has broad petals with gold band in center. The spots vary in color from brown to yellow.

Extra Size Bulbs, 11 to 13	1.00	10.00	75.00
Mammoth Size Bulbs, 9 to 11	.75	7.50	60.00

**Batemanniae.** A beautiful apricot-shaded lily of easy cultivation which does equally well in partial shade or full sun. Stem rooting; plant 6 inches deep. Height 3 ft.

Extra Size Bulbs	.40	4.00	30.00
------------------	-----	------	-------

**Canadense.** A very beautiful native Lily. Flowers range in color from yellow through orange to red, all showing more or less purplish-brown spots. Grows 4 to 5 feet high, flowering June-July. Prefers peaty soil. Stem rooting; plant 8 to 10 inches deep.

Extra Size Bulbs	.20	2.00	16.00
------------------	-----	------	-------

	Each	Doz.	100
<b>Croceum.</b> (The Orange Lily) A robust, strong stem lily bearing huge umbels of beautiful orange colored, upright blooms. Stem rooting; plant 5 inches deep. Height 3 feet; blooms June-July.			
Extra Size Bulbs	.50	5.00	38.00

**Davuricum.** This lily thrives in any fair garden soil and prefers the full sun. The flowers are borne erect in umbels of three to five and are of orange shade, flushed red and spotted black. As the bulbs are small, they should be planted close together about 5 inches deep. Height 2 to 3 feet; bloom June-July.

Extra Size Bulbs	.50	5.00	38.00
------------------	-----	------	-------

**Elegans Mixed.** This is a dwarf group of lilies, flowering during June and July. They include various shades of yellow, buff, orange and red. 12 to 24 inches in height; doing best in light soil; plant 6 inches deep.

Choice Bulbs	.30	3.00	22.00
--------------	-----	------	-------

**Hansoni.** This lily will thrive in almost any soil or situation, but is best grown in partial shade as it fades in full sun. Numerous blooms of deep, rich, orange-yellow shade, spotted brown. Stout stems, 4 to 5 feet high; blooms in June.

Extra Size Bulbs, 9 to 11	1.00	10.00	75.00
Large Size Bulbs, 8 to 9	.75	7.50	58.00

## HARDY CHRYSANTHEMUMS

These plants are indispensable in the garden or hardy border as they produce a profusion of blooms giving color and beauty to the garden at a time when other plants have been destroyed by frost. They are reasonably hardy if planted in a well-drained position and if given a slight protection of leaves or loose litter during the winter.

Chrysanthemums are divided in four groups as listed below. The varieties described below have been selected from an immense list and we believe them to be the best in their respective class and color.

ALL plants — 25c each;

\$2.50 per dozen;

\$20.00 per 100

## ROSES

Everybody who has a garden must have Roses. No home is complete without a few of the dwarf varieties grouped in the garden or in beds in the lawn. A rambler or so on the fence or on a trellis adds greatly to the beauty and arrangement of the yard and garden.

**Culture and Hints on Growing.** Roses like a well drained location where they will get the full sun for at least part of the day. The soil should be prepared at least 18 inches deep with which about one-third of its bulk is replaced by well rotted cow manure. As roses are great feeders, a trowel full of Bone Meal worked around the plant two or three times a season will insure better results.

In planting make the holes rather broader than deep, so that the roots may be spread out naturally in a horizontal position. Set the plant so that the junction of the root and top will be just under the ground surface when leveled off. Work fine soil among the roots, tamping it firmly with fingers and fist, and when roots are all covered tamp it solid. Water the plant well with a full pail of water.

We are in an exceptionally good position to supply extra fine Rose bushes, as they are grown within a short distance from our store, under our personal supervision. All plants are strong, sturdy, 3-year-old bushes and are guaranteed true to name.

## TETHER & DON'S "SPECIAL" LAWN MOWER

After careful and intensive study of lawn mowers, we are pleased to offer the line of "Special Mowers" which we think gives the best and most serviceable machine yet introduced to our many customers.

The special feature of these machines, besides the first-class workmanship and quality of material, is the method of drawcut which is the scientific principle of grass cutting. Briefly, the principle is this. The revolving wiper blades draw the grass across the stationary cutting knife, bending the grass backward at an acute angle. The knife, not the blades, does the actual cutting, the action being identically similar to that in using a pair of shears.

These are light easy running machines, 10 inch wheels; four blade, crucible steel drawcut wiper blades, hardened and tempered. Self-adjusting ball bearings and dust proof oil cups at all moving parts. The under knife is of crucible steel with lipped edge, and is automatically self-sharpening, screwed to the strong, rigid truss knife bar.

We can furnish the Special Mower in four sizes.

14 inch \$12.00; 16 inch \$13.50; 18 inch \$14.00; 20 inch \$15.00

# Pennsylvania Lawn Cleaner

This machine will remove from the lawn not only the cut grass, but all sorts of littler, leaves and trash, leaving the grass standing upright and free from foreign matter that prevents the sunlight and dew from getting to the roots.

The suction created by the three rapidly revolving brushes (or rakes) cleans the lawn on the same principle as the vacuum cleaner operates on carpet. It is easy to operate, and with it one man will do more and better work than four men with hand rakes.

The BRUSHES are recommended for removing worm-casts from putting greens, tennis courts, bowling greens and other close-cut lawns, where a smooth surface is essential. It can be used as a lawn or sidewalk cleaner, for removing leaves and other litter.

Provision is made for adjustment to take up the wear of the brushes, thus insuring the same efficiency of the sweeper until the brushes are entirely worn out.

The change from rakes to brushes, or vice versa, is easily made without taking the machine apart.

Width, inches	24
List Price, each	\$35.00

## TADCO-SPECIAL GARDEN WAGON

The best cart made for use about the lawn, garden, etc. It is built low down and can be easily loaded and unloaded with big trees, shrubbery, balled evergreens, barrels, bay trees in tubs, etc. Will carry a weight of two tons and still run easy. Sixteen inches high over all, platform, 3 feet by 5 feet, made of heavy oak. Has a heavy pole with suitable hitch for horse or tractor when wanted for heavy work. Wheels are 10 inches high, with 4-inch smooth tire, 1½-inch solid steel axels, front wheels turn under platform. Painted green.

Price \$100.00

## WATER BALLAST LAWN ROLLERS

Drum is made of annealed steel with rounded edge, which prevents the cutting of the sod. Fitted with an adjustable scraper to keep the surface of the drum clean.

By filling the roller with water or sand any desired weight can be obtained to suit the lawn conditions. Sand increases the weight 50 per cent more than water.

## PEAT MOSS MANURE POTS

COMPOSED OF CATTLE MANURE, PEAT MOSS AND OTHER PLANT FOOD.  
BAKED TOGETHER AND MOLDED INTO POTS.

The plants not only grow in the pots, but feed on them, the roots growing into and through the sides and bottom. The pots will retain nine times their weight of moisture, thus eliminating sudden drying out of young seedlings. They are also porous.

These pots come in three sizes:

1¼ in. equal to a 2¼ in. clay pot.

1½ in. equal to a 3 in. clay pot.

2¼ in. equal to a 4 in. clay pot.

Supplied in case lots only as listed below:

Case No. 1 contains 1000	1¼ in. Pots	\$10.00
Case No. 2 contains 2000	1¼ in. Pots	19.00
Case No. 3 contains 4000	1¼ in. Pots	36.00
Case No. 4 contains 500	1½ in. Pots	8.50
Case No. 5 contains 1000	1½ in. Pots	15.00
Case No. 6 contains 2000	1½ in. Pots	27.00
Case No. 7 contains 250	2¼ in. Pots	7.00
Case No. 8 contains 500	2¼ in. Pots	12.50
Case No. 9 contains 1000	2¼ in. Pots	22.50

All carefully packed in granulated peat.

Mature two to three weeks earlier. Easy to set out. One man can cover 2500 plants per day. Prices, 100 with Garden Setter \$2.50; 250 with G. S. \$4.00; 1,000 without Setter \$11.00; Special Steel Setter \$2.50.

An "individual  
hothouse for  
each plant."

## GATOR HIDE MULCH PAPER

Increases Garden Crop Yields

Eliminates the Work of Weeding

A new but proved method for the growing of garden crops, which eliminates practically all of the labor of weeding and cultivating. It is simple and easy to lay; just unroll the strips of paper between the rows, or lay it before planting, then cut holes through the paper where the plants are to be set. Besides checking the growth of weeds, this paper holds the moisture and warms the soil thus stimulating the crops, causing earlier maturity and increased yields.

The paper comes in two types each in 18 inch and 36 inch rolls.

Type A.—for Annuals in field culture.

18 inch roll — 300 linear yards to the roll	\$3.50
36 inch roll — 300 linear yards to the roll	7.00

Type B.—for the Perennial in field culture and all garden work.

18 inch roll — 150 linear yards to the roll	\$3.50
36 inch roll — 150 linear yards to the roll	7.00
